

List of Contents

NUMBER 1

- i Softstrip® data strip containing the table of contents for this issue
 - 1 Procedures for defining FSE standards
 - 15 Molecular dynamics of a model polymer on a Hypercube parallel computer
 - 21 An efficient algorithm for comparing two protein sequences: implementation for microcomputers
 - 27 Analyzing the oxidation of graphite using a microcomputer
 - 39 Computerized tritium measurements with a liquid scintillation counter
 - 43 A program system for spectroelectrochemical measurements
 - 65 A molecular graphics suite of programs for a micro-computer to display molecules from Cambridge Crystallographic Data Files and the alpha-carbon backbone of proteins from Protein Data Bank crystal files
 - 83 Similarity and Clustering in Chemical Information Systems, by Peter Willett
- Applications Section*
- Eric F. Brown**
- Marijan Miletić, Ivan Kobal and Teodor Mohar**
- Kurt Kalcher, Herbert Greschonig, Christian Jorde and Alfred Leitner**
- Brian Clarke**
- Book Review*
- DeLos F. DeTar**

NUMBER 2

- i Softstrip® data strip containing the table of contents for this issue
 - 85 Modular libraries and literate programming in software for *ab initio* atomic and molecular electronic structure calculations
 - 91 New algorithm and FORTRAN module to carry out the four-index transformation of atomic and molecular physics wholly in central memory
- Carlos F. Bunge and Gerardo Cisneros**
- Carlos F. Bunge, Annik Vivier Bunge, Gerardo Cisneros and Jean-Pierre Daudey**

- | | | |
|---|------------|---|
| Carlos F. Bunge,
Annik Vivier Bunge,
Gerardo Cisneros and
Jean-Pierre Daudey | 109 | V4ITD: a portable and efficient FORTRAN implementation of the 4IT algorithm using virtual memory and an external storage device |
| Gerardo Cisneros,
Carlos F. Bunge,
Annik Vivier Bunge and
Jean-Pierre Daudey | 141 | E4ITD: a general FORTRAN implementation of the 4IT algorithm |
| D. Cabrol, J. P. Caire et
P. Ozil | 165 | L'utilisation du langage Prolog pour la décomposition des grands procédés chimiques |
| V. M. Miskowski, M. Albin,
M. D. Hopkins,
D. E. Brinza and
H. B. Gray | 171 | Franck-Condon analyses on the IBM PC/AT |
| David J. M. Park Jr | 175 | Positive compositional algorithms in chemical reaction systems |
| <i>Application</i> | | |
| Heikki Joela | 189 | A microcomputer program for second-order simulation of EPR spectra |

NUMBER 3

- | | | |
|--|------------|---|
| | i | Softstrip® data strip containing the table of contents for this issue |
| Carl W. David | 207 | Voronoi polyhedra as structure probes in large molecular systems—VII. Channel identification |
| Iwao Fujita | 209 | Automatic analytical differentiation for nonlinear least-squares calculations |
| A. Muñoz de la Peña,
J. A. Murillo, J. M. Vega
and F. Baringo | 213 | Development of a low-cost interface for coupling a microcomputer with a fluorescence spectrophotometer. Computer-assisted fluorimetry |
| Peter Senn | 219 | The computation of the distance matrix and the Wiener index for graphs of arbitrary complexity with weighted vertices and edges |
| Carl W. David | 229 | Variational calculations on a correlated helium wave function using MAPLE |
| P. Badziag and F. Solms | 233 | An improved SCF iteration scheme |
| E. Wigderson and A. Y. Meyer | 237 | Intramolecular voids and intermolecular channels |
| A. C. Norris and A. L. Oakley | 245 | Electronic publishing and chemical text processing —I. A survey of software for two-dimensional chemical structure editing |

- A. C. Norris and A. L. Oakley** 253 Electronic publishing and chemical text processing
—II. Character and vector representations of chemical structures

Applications

- J. M. Rodriguez Mellado, M. Blazquez and M. Dominguez** 257 A curve-fitting program set for handling of differential pulse polarograms
- T. Förster, B. Atzberger and C. W. v. d. Lieth** 267 CONTAB—a program for connection table generation from linear input

NUMBER 4

- i Softstrip® data strip containing the table of contents for this issue

- J. P. Gastmans, V. E. de Paula et M. Furlan** 285 Etude par microordinateur de l'influence des atomes voisins sur les signaux RMN de ^{13}C

- Joseph Chrastil** 289 Determination of the first order consecutive reaction rate constants from final product

- Jaroslav Kostrowicki, Adam Liwo and Krzysztof Sokolowski** 293 A comparative study on some methods for computing equilibrium concentrations

- F. T. Chau and K. D. Chan** 301 A computer-based temperature measurement system

- Concetta De Stefano, Pietro Princi, Carmeio Rigano and Silvio Sammartano** 305 The calculation of equilibrium concentrations. ESTIME: a computer program for comparing execution times on different machines

Applications

- H. S. Tan, P. Chiarot and W. E. Jones** 317 Microcomputer-assisted temperature programmed desorption studies

- S. Lago and C. Vega** 343 A generalization for mixtures of a fast algorithm to calculate some intermolecular orientational averages

Note

- Tom Nicol** 357 Performance of the HQR111 diagonalization routine

Book Review

- DeLos F. DeTar** 359 The Visual Display of Quantitative Information, by Edward R. Tufte
